

Minigame Quiz:

One player takes a card of the stack of questions.
He reads out the question and the possible answers.

Together the team chooses one answer.

At the bottom of the card the player can check the correct answer

Then another player takes a card.

Win:

The team answers more than six questions right.

Defeat:

The team answers less than five questions right.

Minigame Relay:

One player measures a distance of 50 metres.

The team determines one player, who looks at the time.

The other player runs the relay of 100 metres.

Win:

The team has to be faster than the number of running players multiply with 20 seconds.

Defeat:

The team is slower than the number of running players multiply with 30 seconds.

Minigame explain:

Every player gets one of the wordcards.

Successively every player explains his own word, but without using the word itself, and the time is measured.

It ends when every player have explained his word.

Win:

The team is faster than the number of players multiplied with 15 seconds.

Defeat:

The team is slower than the number of players multiplied with 25 seconds.

Minigame Seven-row:

The team must count to 50.

But they mustn't call numbers, which have a seven or are divisible through seven.

Instead of the number they say „Ding“
they say one of the prohibited numbers they must begin from the beginning

Win:

The team needs not more than three tries.

Defeat:

The team needs more than five tries.

Minigame lie or truth:

Every player takes a paper and writes down 2 lies and one truth about himself.
Then one player begins and reads out his three sentences. The other player has to choose the sentence, which is right.
So every player reads his sentences out.

Win:

The team finds more than the half of the truths.

Defeat:

The team find less than the half of the truths.
